

All computer systems require downtime for periodic maintenance or upgrades. We offer tools to minimize the impact on your organization.

#### Specifically Designed For:

- **Integrated Delivery Networks**

Hospital and Ambulatory systems with widely dispersed Allscripts EHR users that can't fully serve patients during downtimes.

- **Independent Medical Groups**

Groups that may be struggling with cumbersome downtime procedures that rely on paper.

## DOWNTIME SOLUTIONS FOR ALLSCRIPTS ENTERPRISE® EHR CUSTOMERS

AmHiTech's downtime systems offer a secure, read only application that immediately becomes available in the event of an Allscripts Enterprise® EHR outage or planned downtime.

Almost no training or support is required for AmHiTech's application because it works like Google®. Simply type in a key patient identifier and an intelligent search produces likely matches. One more click and their full EHR record is available to view.

Security can be integrated with Active Directory® which means that users don't have to remember a different user id and password for each system.

Call or email us today to schedule a free introductory webinar that will change the way you look at EHR downtime.
