

Specifically Designed For:

- **Integrated Delivery Networks**
Health systems that need a health information system to internally exchange data and help to integrate a comprehensive set of primary care, specialty, diagnostic, and therapeutic services
- **Independent Medical Groups**
Groups that need to maintain their productivity through HIT implementation, improve productivity after implementation, and connect the health information system to a variety of clinical partner organizations.
- **Physician Hospital Organizations**
Organizations that need to implement, standardize, and integrate health IT solutions across disparate sites.
- **Primary Care Associations**
Membership groups that need to find efficiencies of scale in Health IT and to exchange data with diverse, broadly scattered clinical partners.
- **New or Growing Healthcare Systems**
Organizations that require complex coordination to merge standards and workflows and to migrate data from pre-existing platforms to a common enterprise EHR platform.

ELECTRONIC HEALTH RECORD CONSULTING SERVICES

AmHiTech has experienced consultants knowledgeable in all aspects of the EHR planning and implementation life cycle.

We assist organizations in selecting, preparing for and implementing a new EHR product.

Our clinical analysts and physicians can also assist your organization to optimize your current EHR and workflows.

AmHiTech's staff are trained on a variety of EHR products. We take pride in assisting organizations resolve both process and technical issues.

An organization can realize substantial quality and monetary benefits through the 'Meaningful Use' of an EHR. Our unique methodology can quickly assess your EHR environment and develop the framework necessary to comply with Meaningful Use standards.

Call or email us today to schedule a free introductory webinar that will change the way you look at your EHR implementation.
